

Assignment -I : Computer Basics

01 : What is Computer ?

Ans: An electronic device for storing and processing data, typically in binary form, according to instructions given to it in a variable program.

02 : What is RAM ?

Ans: RAM (random access memory) is a computer's short-term memory, where the data that the processor is currently using is stored. A computer can access RAM memory much faster than data on a hard disk, SSD, or other long-term storage device, which is why RAM capacity is critical for system performance.

03 : Where is data stored in a computer ?

Ans: Data is stored in secondary memory (i.e. Hard Disk , Floppy) in a computer.

04 : What is that input device used to type text and numbers on a document in the computer system ?

Ans: Keyboard is the input device that is used to type text and number on a document in the computer.

05 : What are the output devices ?

Ans: The output device displays the result of the processing of raw data that is entered in the computer through an input device.

06 : Which is the input device that allows a user to move the cursor or pointer on the screen?

Ans: Mouse or Touch Pad.

07 : Which language is directly understood by the computer without a translation program?

Ans: Machine Language

08 : What are Input devices?

Ans: The input devices are that devices which is used to give instructions to a computer.
